## Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

## SUMMARY : COMPLETE AFTER INTERVIEW

# QUESTION 8 Work record

Our aim is to trace persons whose work record is not full and to establish both numbers of weeks off work and numbers of weeks in which fewer than 30 hours were worked.

## Weeks off work in year

The procedure is first to ask the general question about numbers of weeks off work. Some informants will be uncertain of the right answer. They can be encouraged by prompts about the last spell off work for unemployment, then sickness and so on down the list. Whenever it is clear they are going back more than 12 months you should move on to the next eventuality on the list. In the appropriate column note the number of weeks for all spells of unemployment, sickness, etc. You must record "O" in all open boxes when the person has had no spell off work for that reason. You may ignore the codes "X" and "Y" under each open box. They are for office use. For easy reference you can record each spell off work alongside the months listed below. (You may in rare instances interview persons, say, who had five or six spells off work through sickness and may need to show some rough working to arrive at the right total. (Please leave any rough working in case of queries.)

## List member of household (informant, 2nd, 3rd) and weeks off work and reason

January.....	July.....
February.....	August.....
March.....	September.....
April.....	October.....
May.....	November.....
June.....	December.....

Some informants may have a quick answer for the first general question (usually because they have a very full or almost empty record of work in the year). You should nonetheless use the same procedure of asking about each type of eventuality and each spell off work as a check. If an informant says he hasn't been off work except for "just odd days because of colds and so on" ASK **How much would it amount to over the past twelve months — one week, two weeks? AND CODE ACCORDINGLY.** For informants (e.g. housewives or students) who have only worked for a few weeks in the year, you may find it quicker to establish first how long they were at work.

As with so many other questions about "the last twelve months" in this questionnaire, informants will often find it helpful if you encourage them to think forwards from a date exactly a year ago.

*Sick 6 weeks during  
last year only*

\*

#### QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

#### QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the starting level for the first month, recording underneath more specific information if known.

**Sick pay amount** What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means earnings before tax.

#### QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

#### QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings before tax: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to—correct to nearest percentage point unless respondent names half a percentage point.

#### QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

#### QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

#### QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

#### QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?", "How many do you use in an average week?". Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

#### QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

#### QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "0" shillings.

P.3 visited for 10 days in 19 years, and would get paid wages - less N.H.I. of sick, had not been off in past year P.T. what employer would give him.

John says he will get a pension from the brewery at age 65, but he says he does not know what proportion of his wages he pays 5/6d per week out of wages

**QUESTION 10 Personal use**

Includes transport to and from work.

**QUESTION 10a Normal repairs**

Excludes repairs caused by negligence of informant or family. **Make and type**—e.g. Vauxhall Cresta, Saloon or Morris 15 cwt. van. The description should be enough for us to look up its second-hand value as a check on the value.

**QUESTION 10d Driver**

This is a polite way of ascertaining whether the car is chauffeur-driven. Thus Code X includes self, family, friends and other employees driving for pleasure and not because they are paid to drive the respondent around.

**QUESTION 11 Other benefits**

**Read the prompts slowly:** they are carefully drafted to cover the perks of both senior and junior staff. **The goods** may vary from free or subsidised coal given to miners to discounts on goods bought or free vegetables, seeds or seedlings. Don't hesitate to pursue it further according to occupations of informants. **Transport** may be free leisure travel given to railway or bus employees or paid holidays given to senior executives. Note this section is supplementary to the use of a vehicle in Q. 10. **Medical expenses** may be premiums to insurance agencies for private medical care or the direct payment of doctors' bills. **Education** can range from free tennis lessons or typing lessons to payment of public school fees. **Shares in the company** can be given free or below market value.

**ENCOURAGE THE INFORMANT** to add items under the various headings together and give time for this to be done. We are interested to know what it would cost to buy these things privately even though the employee might not have chosen to do so (e.g. the employee might have used the Health Service if his employer did not pay for him to have private medical care).

"How much a year are these things worth altogether?"

The point here is that some kinds of entries will be money saved, say, on goods and services which the informant would have had to pay for, whereas other entries will involve things he would never have afforded or thought about. Our aim is to discover what equivalent in extra income would be needed if he did the same things but had to bear the full cost himself.

**QUESTION 13 Satisfaction with job**

The questions are laid out in a form which equally encourage positive or negative answers. You may shorten the question to "Are you satisfied or dissatisfied with ——" providing the informant seems to be genuinely weighing the alternatives.

**Facilities at work** means facilities as asked under Q. 3 earlier.

P3 says he was "not fussy" about job then he left it, but he now thinks it was a decent job, good mates, decent pay and would like to get back.

## CURRENT MONETARY INCOME

### General

This section asks questions in turn of the employed, the self-employed and then everyone, including those who are not employed. Our object is to obtain reliable estimates of income, before and after tax, for each income unit in the household, both for "last week" and "the last 12 months".

### Income Unit

This is any person aged 15 or over, or if in full-time education any person aged 19 or over, together with wife or husband (if she or he has one) and children under 15 (or aged 16-18 if in full-time education), if any. According to this definition a man, wife, and children aged under 15 count as one income unit, but a middle-aged widow and a son who is a university student, or an elderly widow and a single daughter of 40, count as two income units. A household consisting of man and wife with three single children who are all over 15 years of age and who are at work counts as four income units.

### Allocating Income

Usually amounts of income can be entered in the appropriate column, according to the person receiving it. Do not enter any income twice. Do not, for example, enter a particular amount both for the wife and the husband. Nor need you split up any amount part of which is payable for a dependent wife or child. Thus, do not attempt to divide up the total of family allowances; enter the total in the wife's column. And enter an amount for sickness benefit, say, even if it includes sums for the wife and children, in the husband's column (if indeed it is he who receives it).

### Gross and Net

In the first question you carefully ask for the last pay net of deductions and go on in the second question to establish what these deductions are. The answers to both questions effectively give gross and net earnings for the last period for which pay was received and you can build up further information in the questions that follow. You should be conscious of this distinction throughout the section. It will not always be possible to get information both for income after tax and income before tax. Remember that if you cannot get an answer for one you may be able to get it for the other. Make a note whenever you can. We can calculate in the office.

### Last 12 months

Though you start by finding what was the last amount of pay received it is very important also to find what was the average pay during the previous 12 months and gradually build up the total income received by the income unit and the household in those months. You have already filled in a work-record and this will help you to answer several of the questions in the section.

### QUESTION 1 Last earnings

Remember to check earnings for each member of the household, even those of a wife who had a job for only a few weeks in the year, a young son who works only on Saturdays, and a retired man with a part-time job. Second or subsidiary earnings are dealt with in Q. 14. Note that each digit is ruled off from the next. Insert "0" in any column which does not apply. Please note also that we have allowed wider columns on these income pages so that you have enough room to write in figures. But note that you will have to indicate which member of the household received any income if you are obliged to use a fifth or sixth column.

### QUESTION 2 Deductions

Don't forget that a total is better than nothing. If the informant is uncertain say, "I believe it is on your pay slip" and encourage him or her to check. We have asked you to put a tick if in fact you are shown a slip or the informant reads off the amounts. As before, the small boxes on the left are for you to identify the member of the household: "Inf.", "2nd", "3rd", etc.

#### National Insurance contributions

A male employee ordinarily pays 15s. 8d. and a female employee 13s. 2d. per week, although note that a married woman can elect to pay only 7d. per week to cover industrial injuries benefits. Boys under 18 pay 10s. 1d. and girls 8s. 5d. per week. Persons over 18 who are contracted out of the graduated pension scheme pay a higher flat rate insurance contribution of 18s. 1d. (men), 14s. 8d. (women).

#### Graduated pension contributions

The employee contributes 4½ per cent of each pound of gross weekly earnings between the ninth and the eighteenth, i.e. approximately 11½d. for each of these pounds, plus ½ per cent for each pound between the 19th and the 30th, i.e. rather more than 1d. for each of these pounds. In fact a man with gross weekly earnings of £9 pays nothing, one with £13 pays 4s. 0d., one with £21 pays 9s. 0d., and one with £30, 9s. 8d. About one person in every five, however, is contracted out of the graduated pension scheme, but such persons nonetheless pay ½ per cent on each pound of gross earnings between the ninth and the 30th, or a maximum of 2s. 1d.

### QUESTION 3 Highest and lowest

Check the number of weeks worked by turning up the work record. Some people's earnings will have varied only in one or two weeks of the year and it will not be difficult for you to establish an average in (b). Remember Q. 3(b) is very important. Other people's earnings may have varied widely, either because of changes of job or variations in overtime. Do not include variations due to holidays or sickness. If it is difficult to arrive at an average write in the box or in the margins, e.g. 10 weeks @ £15 10s., six weeks @ £18 15s. and 23 weeks @ £24 11s. We will work out the rest. Do not include weeks of holiday or sickness, which are explored later.

### QUESTION 4 Bonuses

If a commission or bonus has been included in Q. 3 do not now amend the answer to that question. If the information is given for the first time write the amount in the box and also strike out "Before" or "After" Tax as appropriate.

It is 4 months since Alan worked & he can not remember what amount of Income Tax paid, or G.P. (days only a few capped) Insurance Stamp 16/8d. He is not part helpful, says G.P. says it costs £4 per week to keep a child in a council home, but only give £4-10-8d. per week. Unemployment benefit, and he does not even get that, because he was one stamp short.

John says every 3 weeks works all day Sat. & Sunday - 1st time and a quarter Sat. Double pay Sunday. Flat Rate with 40 hours, under weeks

Alan changed to £8 per week for working

#### QUESTION 14 Second job

This will have been established in the earlier section on Employment. Repeat the question because earnings from subsidiary occupations tend to be forgotten. For example, painters and decorators may have done one remunerative weekend job for a few weeks several months earlier in the year. A gardener may have done some intensive paid work for various local people in the evenings and weekends of the summer months. Or a university lecturer may have had a remunerative consultancy or a series of well-paid broadcasts at some point in the year. Remember that extra earnings from a source other than usual employment may not be thought of as a second job. You should probe for all kinds of additional earnings, depending on the nature of the usual employment.

#### QUESTION 15

This is laid out as concisely as possible on one page and you are asked to ring 01, 02, 03, etc., as appropriate and then to enter the rates per week and amounts below, carefully writing in the code "01" (i.e. Family Allowances) "02" (i.e. Retirement Pension) and so on so that we are clearly aware of the allowances to which the amounts refer.

Amounts will sometimes be joint—e.g. retirement pension for man and wife—or will be for several members of the household—e.g. sickness benefit for man and wife and children. In these instances the amount should be entered (if necessary, after the interview) in one column only, under that member of household receiving the payment. Wherever possible encourage informants (especially when elderly) to show you the allowance or pension book.

#### CODE 01 Family Allowances

	First child	Second	Third	Fourth & subsequent
up to April 1968 ... ..	nil	8s.	10s.	15s.
after April 1968 ... ..	nil	15s.	17s.	17s.

counting children under 15 or up to 19 if still in full-time education or college or an apprentice on low wages.

#### CODE 02 Retirement Pension

Note that the actual amounts vary widely. Increased pensions are paid if retirement is deferred. There are now in addition small graduated state pensions (averaging about 3s.) and pensions may be reduced because of earnings or a deficient contribution record. Note that some of these points also apply to other benefits. Pensions and supplementary benefits can be combined in a single payment. You will be prompting for supplementary benefit and wherever possible we should like you to list the amount separately (as well as the fact that it is being received). But whenever the rate given to you exceeds the standard rate below you should check the reason.

Single person (husband) ... ..	£4 10s. 0d.
Wife's income ... ..	£2 16s. 0d.
1st dependent child ... ..	£1 5s. 0d.
2nd dependent child ... ..	17s. 0d.

#### CODE 03 Standard Widow's Pension

Note: not the widow's allowance which is paid for the first 26 weeks after widowhood.

Widow or widowed mother ... ..	£4 10s. 0d.
1st dependent child ... ..	£2 2s. 6d.
2nd child ... ..	£1 14s. 6d.
3rd and subsequent child ... ..	£1 12s. 6d.

Depending on the circumstances of the death of the husband (armed service and so on) widows' pensions may differ in size. Note that family allowances are received in addition to dependent children's allowances.

#### Widow's Allowance: Widow £6 7s., children as for widow's pension

#### CODE 04 and 05 Sickness Benefit and Unemployment Benefit

Sickness benefit is often paid for periods other than a week. Find what was the last payment and for how many days (excluding Sundays). A payment for 6 days, excluding Sunday, makes up a "week's" benefit. Note that an earnings-related supplement may be paid in addition to the flat rate benefits listed below. Moreover, these benefit rates depend on the contribution record.

Single person ... ..	£4 10s. 0d.
Married woman ... ..	£2 16s. 0d.
1st dependent child ... ..	£1 5s. 0d.
Each subsequent child ... ..	17s. 0d.

#### CODE 06 Supplementary Benefit

The former "national assistance". Rent is sometimes paid direct to the landlord by the Supplementary Benefits Commission. There is a check later that the amount is known and counted as income.

#### CODE 07 Industrial Injury Benefit

£6 7s. 0d. (with additions for dependants) is payable for the first 26 weeks after injury after which the injured person goes before a Board to have his injury assessed for an individual disablement pension.

#### CODES 08 and 09 Industrial and Disablement Pensions

The 100 per cent rate is £7 12s. 0d. (with additions for dependants). CODE 09: Note that these are war pensions, not service pensions included under occupational pensions later in Q. 19.

#### CODE 10 Maternity Allowance

The standard rate of maternity allowance is £4 a week. It is paid to women who have been paying full national insurance contributions. It begins 11 weeks before the expected confinement and ends after the sixth week following it.

#### CODE 11 Maternity Grant

This grant is £22 either for home or hospital confinement.

#### CODE 14 Single Grant

This is officially described as an exceptional needs grant. The Ministry of Social Security has replaced the former National Assistance Board and you may need to explain "a grant from the Assistance". Probe carefully for this for all income units who are not employed, whether or not they receive supplementary benefit. A large number of people obtain single grants, e.g. for spectacles or dentures, even though they are not normally eligible to receive supplementary benefit. Note also that since you are asking about a period of 12 months there will be instances of people now in work who obtained a grant at an earlier point in the year.

Alan is one stamp that he liked unemployment pay doctored 6/10s. pw. Very rate about this. Says he "eats a lot".

#### QUESTION 4 Special schools & centres

This question is asked only of persons who have been ill and off work or confined to bed or the house for eight weeks or more continuously, and those who are coded for any item in Question 3.

#### QUESTION 5 Date of onset of sickness or disabling condition

Our object is to establish the year of onset but the question is worded 'first have any condition' so as to allow for the fact that some conditions develop out of others. For persons with a disabling condition you ask, in effect, when all the trouble started.

#### Previous occupation

In the section on Employment you have already asked for the last occupation of everyone not now at work (p. 7). Some people change their occupation because of a disabling condition before finally being obliged to give up work. You should probe for the (previous) occupation which people had before any history of illness or disability started.

#### QUESTION 6 Mobility

You should code people according to their usual mobility, taking no account of a temporary illness or injury. "Usual mobility" may be interpreted as "for at least eight weeks and unlikely to become more mobile in the immediate future" or "for less than eight weeks but unlikely to become more mobile within at least that total period." Someone who spends most of the time in bed and needs help to get out to sit in a chair is defined as bedfast. Someone who can get out of his bed into a chair or wheelchair and who can walk indoors but not even a few yards outdoors without help is defined as housebound. The test is whether someone can walk on his own (without the assistance or company of any other person — though with or without sticks or crutches).

#### QUESTION 7 Incapacity

In prompting this series of questions you may find it simplest to ask the question without the variation in brackets, unless it seems appropriate. Remember you are asking whether they have any difficulty in doing X. Sometimes certain questions will not apply to particular people or to particular situations. You will meet people who do not (or say they do not) wash down, negotiate stairs (living in bungalows), go shopping and do housework (especially some men). The question should then be asked in terms of "But would you have any difficulty in doing X if you had to?" The codes 0, 1, 2 are listed in increasing order of difficulty and you should check that you ring one of them for each item.

#### QUESTION 7e

It would be insensitive and unnecessary to ask questions about the daily activities of the bedfast. They are therefore excluded from this question and the rest of the series. You may encounter other people (e.g. advanced obesity) of whom it is clear that they cannot do certain activities. You may refrain from putting questions to them. The same is true of any situations in which the questions are likely to cause great distress. BUT AS A GENERAL RULE QUESTIONS 7 (e) to (i) SHOULD BE ASKED FOR ALL OTHER THAN THE BEDFAST AND CHAIRFAST.

#### QUESTIONS 8 & 9 Variation in incapacity

These questions explore whether the pattern of answers to Question 7 is permanent. Question 8 seeks any indication of seasonal variations (e.g. bronchitis) and Question 9 day-to-day variations in the effects of disability.

*Little suffered from very bad headaches, had not seen Dr. for years. D.K. who cures them.*

Out of \$12 Julian spends  
about \$2 on own  
entertainment (betting etc)  
and \$5 on rent light etc

John gives Julian \$12 pw. out of  
which she pays everything rent, coal  
light food. Alan gives her \$12 pw. for  
his board (note when he is working)

#### \*QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

#### QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

#### QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

#### QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

#### QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

QUESTION 23 Poor now

Stress genuinely and try to avoid facetiousness at this point. Question 23 (a) explores what the informant understands by feeling "poor". If the word "poor" seems inappropriate use the alternative "very hard up".

QUESTION 24 Poverty

Stress the word "poverty". Do not explain what you think it means if you are asked. Seek from the informant his definition and write it in the box as clearly as you can.

QUESTION 25 Voting

Ask for those old enough to have voted in the last election (March 1965). We are not concerned who they voted for (although they will probably say) but would like to know if they are sufficiently involved to vote at all. Be careful to reassure people that this is confidential and as far as you are concerned non-voting is blameless—many people consider that voting is legally compulsory or morally obligatory and so voting figures are over-estimated. Try to get a clear recollection by fixing the incident (time of day, who they went with) if necessary. Stress **National**, not local elections.

QUESTION 26 Action on poverty

We are interested in what the informant thinks can be done. Give as full an answer as possible.

\_\_\_\_\_  
Please write in any additional notes.

\* they gave you food cards, valued at say  
5/- when that was used up you went for  
more. There isn't poverty like that now, nothing  
like it, but there are still some with no money,  
usually of them as won't work, leaving the real  
folks out, I mean.

ASK CHIEF WAGE EARNER/H.O.H.

CODE C.W.E./H.O.H. ONLY

23. Do you think you could GENUINELY say you are poor now? —

PROMPT AND CODE ONE ONLY

CODE C.W.E./H.O.H. ONLY

24. (a) There's been a lot of talk about poverty. Do you think there's such a thing as REAL poverty these days? \*

Does Not Apply SKIP TO Q.25

yes

no

DK

(b) What would you describe as poverty?

WRITE IN ANSWER

When you've no money, that's poverty. There isn't poverty like there used to be. I can remember going for food tokens, they didn't use to give you money.

(c) Would you say that if people are in poverty its mainly

PROMPT AND CODE ONE ONLY

X - their own fault?

Y - the Government's fault?

0 - the fault of their education?

1 - the fault of industry not providing the right jobs?

2 - anything else? (SPECIFY)

3 - a combination of (some of) these?

4 - none of these?

ASK CHIEF WAGE EARNER/H.O.H.

CODE C.W.E./H.O.H. ONLY

26. If there is poverty what do you think can be done about it?

nothing

DK

WRITE IN ANSWER

The Government to give the poor free work, and make all the young ones work. Tell them no work no money. That's all, they'd all work just enough.
