

## The Disabled

General hypothesis: Society tends to deny the disabled access to different kinds of resources. ~~Disability~~ There are multiplier effects of deprivation from disability. People are unable to get work and they have needs for income which are not always met. Moreover they need more income than people who are not disabled. Others in the household ~~are~~ may be prevented from taking paid employment, or they are prevented from sharing, or sharing to the same extent, the activities and pleasures of most people of their age.

### Discussion of Concept

#### Definition and Measurement

Poverty + Disability

Disability score

Disability conditions

Conclusion That because the number of older people will grow, + because more young disabled adults can be kept alive, the proportion of disabled will grow.
